

Peace between Israelis and Palestinians

The conflict between Israelis and Palestinians is not someone else's problem, is a matter of interest to the peace movement in Colombia.

We deeply feel the suffering of the population and the extreme acts of violence regarding causes that both Israelis and Palestinians consider just.

Both populations deserve to have guaranteed their existence and their tranquility and no nothing justify Israeli's indiscriminate levels of aggression against Palestinians. The defenseless populations, the civil population cannot be punished because of some individual's irrational acts of violence, nowhere in the world.

The impotence of international organisms to stop the humanitarian catastrophe is clear and pathetic. The friends, the defenders and constructors of peace around the world must make their voice heard and act until stopping the horror and achieve to open peace dialogues in conditions of truce respected by the parts.

The moral and political force of the peace must impose over the violence, the terror and the war. The dialogue must replace the confrontation. We want vividly the peace between Palestinians and Israelis as we want it between Colombian people, in the regions and throughout the world.

REDEPAZ proposes to arrange a world-wide day for peace and the rights of the Israeli and Palestinian population impulse by the movements of peace existing in different countries and regions.

No more aggression in and from Gaza. Total respect of the civil population. Peace dialogues now!!
